Everyday bumps can weaken ordinary tires

... lead to blowout danger on the Highway

Now nylon cord gives tires lasting strength, means new freedom from fear of blowouts

Nylon's shock-absorbing toughness stops off the everyday road shocks that can cause stress damage to ordinary tire cord, lead to blowouts under the stress of highway driving. For today's heavier, more powerful cars, for the increased speeds permitted on today's highways, nylon cord tires give you a greater extra margin of safety. The lasting strength and protection of nylon cord tires have been proved in billions of miles of use by trucks.

All tire companies make nylon cord tires. Whether you choose premium or standard nylon tires, they offer you greater protection than comparable tires made with ordinary cords. Look for the identification on the sidewall. Insure an nylon when buying new tires — change to nylon when buying a replacement.

NYLON CORD PROTECTS AGAINST ONE MAJOR CAUSE OF BLOWOUTS
